DOING GOOD: ALL OF US WORKING TOGETHER!

We'd like to take a moment to say thanks and highlight some of the wonderful local charities which help underprivileged children in Eugene/Springfield. What you do truly makes a difference!

Thanks to all our Sanipac customers as well. By partnering with us we are given the opportunity to partner with these groups and give back. So next time you

roll your can out to the curb you can know you've helped do your part to make our community a great place to live!

Sometimes it's hard to know where to start when you'd like to help out. Here are some great children's organizations we've been privileged to work with and who do an amazing job in our community. Feel free to give them a quick call and say thanks for all they do!

Have a great day,

Scott Johnson

Hints From Your Hauler: CART PLACEMENT

1st Option--If there is a grass strip between the curb and sidewalk place your carts and blue box on the grass next to the curb.

2nd Option--If the sidewalk is directly next to the street, place the carts and blue box in the street with the wheels against the curb.

3rd Option--If placing the equipment in the street blocks a bike lane, place the equipment on the apron of your driveway.

Your **BLUE BOX** is for **CLEAN** and **UNBROKEN GLASS ONLY**

"Glass recycling is not available in all of our service areas"

COMMINGLE RECYCLE INSTRUCTIONS:

All Recycling Must Be **CLEAN**

INCLUDE ONLY THE FOLLOWING ITEMS:

- **Cardboard** - must be flat
- **Paper** - mail, newspaper, magazines, phone books, paper bags, wrapping paper, computer paper, colored paper
- **SHREDDED PAPER** - must be contained in a paper bag with the top rolled closed
- **Plastic** - jugs, tubs & bottles only - **NO LIDS**
- **Metal** - food and beverage cans (**NO UNATTACHED LIDS**) & clean aluminum foil crumpled into a ball no smaller than a fist

COMPOSTING

BACKYARD COMPOSTING IS A SIMPLE METHOD OF TURNING HOUSEHOLD WASTE INTO VALUABLE FERTILIZER AND ORGANIC SOIL FOR YOUR GARDEN. Understanding the composting process is an important first step. All composting requires three basic ingredients:

- **Browns** - Including materials such as dead leaves and small branches (provides carbon)
- **Greens** - Including materials such as grass clippings, fruit and vegetable scraps and coffee grounds (provides nitrogen)
- **Water** - (provides moisture to help breakdown the organic matter)

It's important for compost development to have the right amount of greens, browns and water.

The following is a commonly-used method:

1. Put your compost pile or bin in a shady spot near a water source.
2. To start the composting process you will need **50% green materials** and **50% brown materials** cut into pieces no larger than 1" in size. Mix the materials and **add water** every 7-10 days.
3. After your compost pile is established, add brown materials and green materials as you collect them. Bury fruits and vegetable matter under 10 inches of compost material. Be sure to moisten materials as they are added.

To aid the process, you can cover the compost pile with a tarp to keep it moist. Turning your compost pile periodically also aids the composting process.

Composting is a naturally-occurring process and even with a minimal amount of attention, you can have wonderful results.

Sharps NEVER belong in your recycling or garbage carts!
