

5TH ANNUAL SCHOOL SHOE DRIVE

Sadly, last year over 2,000 Lane County students experienced homelessness during the school year.

The McKinney Homeless Education Program provides educational stability to those homeless children in our area during their time of turmoil. Liaisons in each school district assist local families directly with basic needs such as school supplies, transportation to school, clothing and shoes.

Particularly during this time of year there is a great need for BACK TO SCHOOL SHOES

We want to thank so many of you, who over the years have responded to requests in our newsletter to provide school shoes to homeless children in Lane County!

It's that time of year again, so let's all work together to give every child in need a running start to the school year! It's very simple: If you would like to donate school shoes to homeless children in our area simply purchase a gift card at a local shoe retailer, and contact your

school district and ask for the McKinney Homeless Education Program Liaison:

Eugene 541-790-7220
Springfield 541-744-2581
Bethel 541-461-6424
Fern Ridge 541-935-2253
Creswell 541-895-6107

The liaison will make sure your donations for shoes go to those children in need.

All of us at Sanipac would like to thank you so much for your generosity in our community!

Doing good in our community one shoe at a time

If your pick up day falls on or following one of these holidays, your pick up will be one day later ending with Friday's pick up being done on Saturday.

New Years Day **Labor Day**
Memorial Day **Thanksgiving Day**
4th July **Christmas Day**

Example: Thanksgiving Day only affects Thursday & Friday customers

COMPOSTING

Backyard composting is a simple method of turning household waste into valuable fertilizer and organic soil for your garden. Understanding the composting process is an important first step. All composting requires three basic ingredients:

- **Browns** - Including materials such as dead leaves and small branches (provides carbon)
- **Greens** - Including materials such as grass clippings, fruit and vegetable scraps and coffee grounds (provides nitrogen)
- **Water** - (provides moisture to help breakdown the organic matter)

It's important for compost development to have the right amount of greens, browns and water.

The following is a commonly-used method:

1. Put your compost pile or bin in a shady spot near a water source.
2. To start the composting process you will need 50% green materials and 50% brown materials cut into pieces no larger than 1" in size. Mix the materials and add water every 7-10 days.
3. After your compost pile is established, add brown materials and green materials as you collect them. Bury fruits and vegetable matter under 10 inches of compost material. Be sure to moisten materials as they are added.

To aid the process, you can cover the compost pile with a tarp to keep it moist. Turning your compost pile periodically also aids the composting process.

Composting is a naturally-occurring process and even with a minimal amount of attention, you can have wonderful results.

Please BAG all loose & dusty items
Bag it!

- ★ vacuum dust, ★ animal waste,
- ★ kitty litter, ★ packing peanuts
- ★ sawdust, ★ shredded paper

Hints From Your Hauler: CART PLACEMENT

1st Option--If there is a grass strip between the curb and sidewalk place your carts and blue box on the grass next to the curb.

2nd Option--If the sidewalk is directly next to the street, place the carts and blue box in the street with the wheels against the curb.

3rd Option--If placing the equipment in the street blocks a bike lane, place the equipment on the apron of your driveway.
