

The Sanipac® Recycler

Spring 2014

Sanipac: Partners With Children's Miracle Network

Sanipac and the Children's Miracle Network (CMN) have teamed up to help raise awareness for CMN and the amazing benefits it provides for families in our community.

Children's Miracle Network Hospitals raise funds and awareness for local children's medical services. 100% of the money fundraised stays local and goes directly to supporting the advancement of medical care for children in the communities where dollars are raised. No money goes to pay overhead or administrative costs. CMN is able to buy vital equipment for PeaceHealth Sacred Heart Riverbend and fund numerous programs throughout the community.

Of the 170 CMN Hospitals, three of them are in Lane County, one being Riverbend.

At Riverbend there will be roughly 2500 births and 600 NICU admits per year. With Pediatric services seeing almost 15,000 patients per year from Lane County alone.

You can help make a difference by donating funds, event items or simply by volunteering your time. If you have questions or you would like to make a donation, please go to cmn-khk.com.

Sanipac is proud to be able to support such a great organization and help spread awareness about the amazing things CMN Hospitals, like Riverbend, are doing for the families in our community.

***It's all of us working together
that makes this a great place to live!***

Hints From Your Hauler: CART PLACEMENT

1st Option--If there is a grass strip between the curb and sidewalk place your carts and blue box on the grass next to the curb.

2nd Option--If the sidewalk is directly next to the street, place the carts and blue box in the street with the wheels against the curb.

3rd Option--If placing the equipment in the street blocks a bike lane, place the equipment on the apron of your driveway.

COMMINGLE RECYCLE INSTRUCTIONS:

All Recycling Must Be **CLEAN**

INCLUDE ONLY THE FOLLOWING ITEMS:

- **Cardboard** - must be flat

If your pick up day falls on or following one of these holidays, your pick up will be one day later ending with Friday's pick up being done on Saturday.

New Years Day **Labor Day**
Memorial Day **Thanksgiving Day**
4th July **Christmas Day**

Example: Thanksgiving Day only affects Thursday & Friday customers

COMPOSTING

Backyard composting is a simple method of turning household waste into valuable fertilizer and organic soil for your garden. Understanding the composting process is an important first step. All composting requires three basic ingredients:

- **Browns** - Including materials such as dead leaves and small branches (provides carbon)
- **Greens** - Including materials such as grass clippings, fruit and vegetable scraps and coffee grounds (provides nitrogen)
- **Water** - (provides moisture to help breakdown the organic matter)

It's important for compost development to have the right amount of greens, browns and water.

The following is a commonly-used method:

- 1. Put your compost pile or bin in a shady spot near a water source.
- 2. To start the composting process you will need **50% green materials** and **50% brown materials** cut into pieces no larger than 1" in size. Mix the materials and **add water** every 7-10 days.
- 3. After your compost pile is established, add brown materials and green materials as you collect them. Bury fruits and vegetable matter under 10 inches of compost material. Be sure to moisten materials as they are added.
To aid the process, you can cover the compost pile with a tarp to keep it moist. Turning your compost pile periodically also aids the composting process.

Composting is a naturally-occurring process and even with a minimal amount of attention, you can have wonderful results.
