

The Sanipac® Recycler

Summer 2014
Residential Edition

Willakenzie Crossing is our newest community and showcases how we build in collaboration with surrounding neighborhoods and ultimately revitalize communities. Willakenzie Crossing targets several green and sustainable focus areas to support residents who live in this community.

- ❖ Silver LEED Certification in the community center
- ❖ Photovoltaic panels help reduce energy use and lower energy costs
- ❖ Community gardens grow flowers, fruits and vegetables

Spring 2014: Brayden Helping to release ladybugs into the garden

Cornerstone Community Housing was founded nearly two decades ago to help bridge the gap between wages and the high cost of housing in the area. Having an affordable place to call home gives children an opportunity to succeed in school and everyone an opportunity to build better lives.

Cornerstone Community Housing's mission is to build quality affordable housing for people on limited incomes and provide services that promote opportunities for personal growth and economic independence.

(Willakenzie Crossing with Photovoltaic Panels)

Cornerstone Community Housing works to connect people with on-site services that focus on green and sustainable living. Each year we offer "ArtCycle" in collaboration with Sanipac. The program involves making fun crafts with recycled materials and teaches recycling methods. Teen Chef and Oh Snack classes help youth develop healthy nutritious lifestyles. Community celebrations include Movie Nights and Summer Barbeques with the Sanipac Duck Truck.

Donations are always needed to support affordable housing and programs. Please consider making a donation TODAY. To learn more find us on Facebook, visit our website or call us at 541-683-1751

Haul-i-days

If your pick up day falls on or following one of these holidays, your pick up will be one day later ending with Friday's pick up being done on Saturday.

- | | |
|----------------------|-------------------------|
| New Years Day | Labor Day |
| Memorial Day | Thanksgiving Day |
| 4th July | Christmas Day |

Example: Thanksgiving Day only affects Thursday & Friday customers

COMPOSTING

Backyard composting is a simple method of turning household waste into valuable fertilizer and organic soil for your garden. Understanding the composting process is an important first step. All composting requires three basic ingredients:

- **Browns** - Including materials such as dead leaves and small branches (provides carbon)
- **Greens** - Including materials such as grass clippings, fruit and vegetable scraps and coffee grounds (provides nitrogen)
- **Water** - (provides moisture to help breakdown the organic matter)

It's important for compost development to have the right amount of greens, browns and water.

The following is a commonly-used method:

1. Put your compost pile or bin in a shady spot near a water source.
2. To start the composting process you will need 50% green materials and 50% brown materials cut into pieces no larger than 1" in size. Mix the materials and add water every 7-10 days.
3. After your compost pile is established, add brown materials and green materials as you collect them. Bury fruits and vegetable matter under 10 inches of compost material. Be sure to moisten materials as they are added.

To aid the process, you can cover the compost pile with a tarp to keep it moist. Turning your compost pile periodically also aids the composting process.

Composting is a naturally-occurring process and even with a minimal amount of attention, you can have wonderful results.

Sharps **NEVER** belong in your recycling or garbage carts!

Call 541-736-3600 ext. 0 for proper disposal information

Your **BLUE BOX** is for **CLEAN** and **UNBROKEN GLASS ONLY**

"Glass recycling is not available in all of our service areas"

Please **BAG** all loose & dusty items
Bag it!

- ★ vacuum dust,
- ★ kitty litter,
- ★ sawdust,
- ★ animal waste,
- ★ packing peanuts
- ★ shredded paper

Hints From Your Hauler: CART PLACEMENT

1st Option--If there is a grass strip between the curb and sidewalk place your carts and blue box on the grass next to the curb.

2nd Option--If the sidewalk is directly next to the street, place the carts and blue box in the street with the wheels against the curb.

3rd Option--If placing the equipment in the street blocks a bike lane, place the equipment on the apron of your driveway.
