

# The Sanipac® Recycler

Spring 2017

Commercial Edition

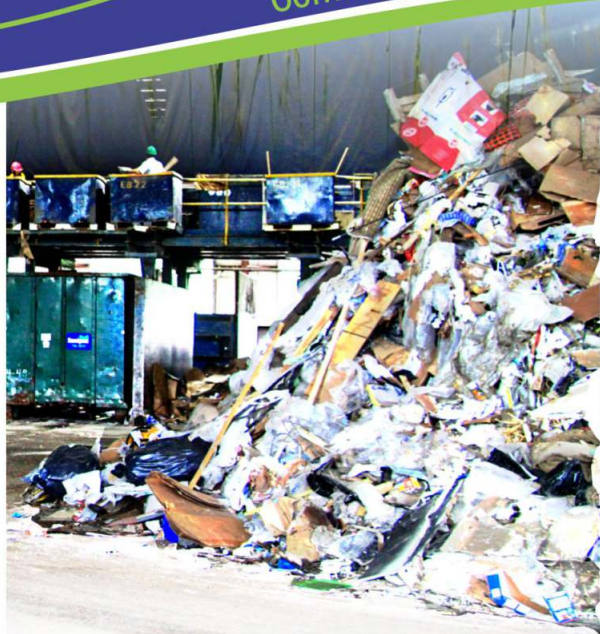

Did you know that Sanipac offers waste audit services to interested commercial customers? You may be asking yourself “what is a waste audit”? The purpose of a waste audit is to ensure that we are all doing our part to be green. Here is how the waste audit works;

**Site Tour** – One of our commercial account managers will tour your facility in order to evaluate your waste streams and determine if there are materials being thrown away that could be recycled.

**Container Placement** – by having your trash and recycle containers placed next to each other, you are increasing the likelihood that people will choose to recycle. When trash and recycle containers are placed in different locations, people are more likely to throw recyclable items away or contaminate recyclable items with trash.

Our ultimate goal is to ensure we are diverting as much waste from the landfill as possible; in turn reducing your waste expense. *It takes all of us working together to make this a great place to live.*

**Call 541-736-3614 to schedule a waste audit for your business.**
