

The Recycler

Hello from Sanipac! Thanks to everyone for all your hard work in keeping the recycling in our area as clean as possible. Please see the list below of common items that contaminate recycling, as well as a list of acceptable items on the back page. Thank you so much for continuing to keep our area a leader in recycling!

	Issue	Reason	Solution
	Plastic bags and film	Bags and film jam equipment at the sorting facility and create slow downs in processing. Removing the film from the processing equipment is difficult.	Plastic grocery bags are accepted for recycling at many local grocery stores. Or dispose of as trash.
	Plastic clamshells	There is no current market for this material. Processors receiving a high level of these contaminants can potentially reject entire loads of recycling.	Dispose of as trash.
	Styrofoam	Unwanted by processors. Breaks up into small pieces and contaminates other recycling.	St. Vincent de Paul has a styrofoam recycling program. For more information visit: www.svdp.us Or dispose of as trash.
	Napkins and paper towels	Unwanted by processors. Can contain food/liquid which contaminates other recyclables.	Napkins and paper towels can also act as a good source of carbon for backyard compost piles. Or dispose of as trash.
	Any plastic item that is not a milk jug or translucent drinking bottle (water/soda/juice)	Market conditions have caused these materials to be unwanted by processors as part of a mixed recycle stream.	Save these items for periodic "plastics roundup" events in our area. For more info please visit: www.lanecounty.org Or dispose of as trash.
